

## Dr Anand Masilamani

MBBS FRCS DO USM LE

Dr Anand Masilamani began his career at the Stanley Medical College in Madras, India. Following his graduation in 1994, he furthered his medical training in general ophthalmology, receiving his Diploma in 1998.

During his postgraduate residency years, he gained invaluable experience in eye trauma management, cataract and glaucoma surgeries, as well as participating and operating in various remote surgical camps in remote areas.

In 1998, Dr Masilamani came to the UK to further his training. He worked as a Senior House Officer (SHO) in a number of hospitals, including the Victoria Hospital, Blackpool.

During the three and a half years as an SHO, he trained in phacoemulsification of cataracts, as well as various oculoplastic and corneal grafting procedures, and has performed laser treatments using the ARGON and the Nd: YAG laser, for various ocular disorders.

He received his Fellowship from the Royal College of Surgeons (Edinburgh) in November 2000, and is a member of the European and United Kingdom Society of Refractive Surgeons.

While undertaking a Fellowship in Medical Retina at Queens Medical Centre, Nottingham, he passed the necessary licensing exams to practice medicine in the United States.

Dr Masilamani specialises in LASIK using the latest Femtosecond technology. He also trains ophthalmologists from the NHS in laser refractive surgery.

Dr Masilamani joined Optimax in 2003.
